Subject RE: Any construction this summer?

History: This message has been replied to and forwarded.

Randy - In response to your question, EPA has recently provided Asarco verbal approval of the CAMU Phase 2 Design Analysis Plan. EPA will send a confirmatory letter in the next few weeks. With the 2007 construction season rapidly closing, the CAMU is now scheduled for construction in 2008. In 2007, Asarco is scheduled to conduct specific cleaning and demolition in the vicinity of the proposed speiss-dross slurry wall. The waste generated from this activity will be temporarily stored in containment buildings until it can be placed into the CAMU for permanent storage. We have conducted a pre-bid walk-through of the speiss-dross slurry wall with an anticipated start date for the wall sometime in mid September 2007. The attached letter provides further explanation of the work Asarco anticipates for this year.

Good hearing from you.  
Jon Nickel

Subject: Any construction this summer?

I was wondering if you were planning on beginning construction of the CAMU this summer? If you are, what's your tentative schedule.

Hope all is well, I haven't heard from you in quite awhile.
